

Specification:

Material	Rolled steel pipe according to PN-EN 10210-1:2006; PN-EN 10219-1:2006
Steel Types	S235JRH, S275J2H, S355J2H
Versatility	GroundForce piles are fully compatible with any carport model

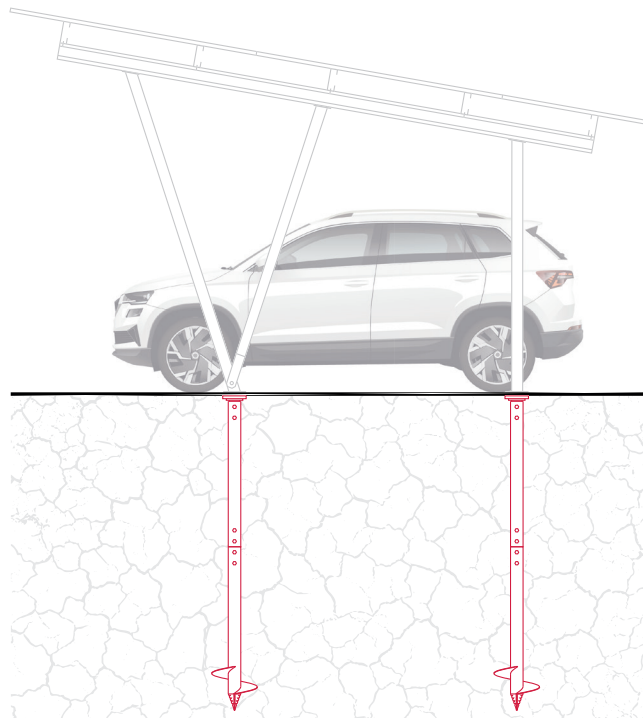

Comparison with traditional foundations:

Characteristic	Screw piles	Traditional/prefabricated foundation
Installation Time	1-3 days	1-3 weeks (earthworks, formwork, concreting, surface reconstruction)
Seasonality	Year-round installation	Limited in winter
Environmental effect	Minimal	High (excavation, noise, concrete)

Price Guarantee	Full transparency and no surprises. As the manufacturer, we ensure that the quoted price remains fixed.
Quick Installation	No concrete, no digging, and no long curing times required.
Cost-efficiency and Convenience	Foundation pile installation does not require costly earthworks, formwork, reinforcement, or concreting.

Example of use:
VECTOR 2

Example of use:
BASIC Y
